

Train with Almex Institute. We'll teach you how to splice right.

Plus, you'll learn how to become a better conveyor system advisor. Learn how to "get and keep" your conveyor system operating at peak efficiency, making you the go-to person in your organization.

Get the Almex Institute advantage, learn the right skills while working with the right tools and getting the right hands-on experience.

Learn about:

- Steel cord belt splicing
- Finger splicing heavyweight rubber belting
- Step splicing of fabric belts
- Vulcanizer set-up and operation

Learn how to:

- Identify and understand conveyor belt problems
- Provide recommendations on system design and belt selection
- Execute and evaluate multiple types of splices
- Become a conveyor solutions provider for your customer in selection, care, maintenance and problem solving

Learn with:

- Classroom instruction
- Small group discussion
- Question and answer sessions
- Hands-on application
- Interesting experiments and samples that take learning beyond the spoken word

Learn from:

- Almex Institute instructor, Michael Cremeens. Mike brings over thirty years of experience to the classroom and has taught in over twenty-five countries. He has instructed more people in belt splicing than any other trainer in North America.
